

CAREER SUMMARY

Curious and self-driven Computer Science and Engineering undergraduate with hands-on experience building real-world Android/Firebase applications, AI-assisted software systems, and LLM-based workflows. Skilled in using modern AI tools and agents to design, develop, test, and improve practical solutions. Interested in Android development, AI integration, LLM fine-tuning, cybersecurity, and problem-solving.

EDUCATION

B.Sc. in Computer Science and Engineering

Mawlana Bhashani Science and Technology University (MBSTU)

Session: 2024-2025

Expected Graduation: 2028-2029

Current: 1st Year, 2nd Semester

Higher Secondary Certificate (HSC)

Sherpur Government College, Sherpur | Mymensingh Board

Passing Year: 2023

GPA: 5.00/5.00

Secondary School Certificate (SSC)

Harindhara High School, Sherpur | Mymensingh Board

Passing Year: 2021

GPA: 5.00/5.00

TECHNICAL SKILLS

Programming

C, C++ (Intermediate)

App Development

Android development, Kotlin/Java project-based development, Firebase-based applications

Backend & Database

Node.js project-based exposure, MongoDB basics, Firebase Authentication, Firestore, Realtime Database, Firebase Storage

AI & LLM

AI-assisted development, LLM dataset preparation, Hugging Face, Python-based fine-tuning workflow, AI integration in software systems

Tools & Languages

GitHub, Android Studio, VS Code, Firebase Console | Bangla and English

PROJECTS

ClassMate - Notice, Resource & Class Management App

GitHub: github.com/shuaibuddowla/ClassMate

- Built and published a solo Android/Firebase app for 60+ CSE-22 students at MBSTU through GitHub Releases.
- Developed instant notices, daily class schedules, group chat, faculty-provided PDF/file library, notice comments, class test tracking, and assignment deadline tracking.
- Used Firebase Authentication, Firestore, Realtime Database, and Storage to support user data, communication, and academic resource management.

PhantomTrace - SMS-Triggered Lost Phone Tracking App

GitHub: github.com/shuaibuddowla/PhantomTrace

- Built and tested a lost-phone tracking app that responds to a secret SMS code by sending the phone location to the user.
- Added a full-volume alarm trigger and dual fallback SMS response system to improve reliability during real-user testing.
- Developed using Kotlin, Java, and Firebase.

AI Political Analyzer - LLM Fine-Tuning Project

- Working in a 5-6 member team on an AI-based political analysis project using an open LLM fine-tuning workflow.
- Responsible for dataset preparation by extracting and organizing political podcast subtitles from YouTube.
- Using Hugging Face and Python for dataset processing and fine-tuning preparation.

ACHIEVEMENTS & ACTIVITIES

- Participated in ICPC Asia Dhaka Regional Preliminary Contest 2026.
- Achieved 2nd position with team in Breaking Code 2.0, a programming contest arranged by the Department of CSE, MBSTU.
- General Member, MBSTU Cyber Security Club.
- Actively support classmates through informal student leadership, problem-solving, and emergency assistance when needed.

STRENGTHS & INTERESTS

Strengths: Curious Builder, Problem Solver, Fast Learner, AI-Assisted Developer, Responsible Team Player

Interests: Photography, Cricket, Problem Solving, AI Systems, Cybersecurity
